70 Years of Experience

CRL is a specialist contractor with over 70 years of experience, delivering complete repair and refurbishment services to the clean and dirty water sectors across the UK. The company operates an integrated Safety, Health, Environmental, and Quality management system and is certified to ISO 14001, ISO 9001, ISO 45001, PAS 2080 and ISO 44001. In recognition of

its sustained commitment to Health & Safety, CRL was awarded a RoSPA Order of Distinction in 2025, marking 25 consecutive RoSPA Gold Medals. Through its School of Excellence and rigorous management systems, CRL continues to provide safe, efficient, and innovative solutions, consistently delivered to the highest professional sustainable standards.

Cost-Effective Solutions

CRL has delivered cost-effective, sustainable solutions since 1955, employing the latest refurbishment techniques and materials, alongside work practices designed to provide best-value outcomes. CRL understands the critical importance of maintaining water quality and supply, ensuring that programming, asset utilisation, and repair decisions

are always carefully considered when selecting materials and methodologies. CRL works closely with water companies to identify the root cause of issues, quantify the required repairs, and establish realistic time-scales for the works. CRL consistently delivers solutions that are efficient, long-lasting, and environmentally sustainable.

Nothing is so **important**
that it cannot be done **safely**
and **sustainably**

Extending the Life of Your Wastewater Structures

Failure to properly maintain wastewater assets can lead to significant safety, environmental, and financial risks. Using the latest repair techniques and advanced materials, CRL can restore your concrete structures to their original new-build standards, significantly extending their service life. From wastewater treatment plants affected by +H₂S attack to the refurbishment of concrete digesters, primary settlement tanks (PSTs), distribution chambers, aeration lanes, storm tanks, steel surge tanks and vessels, and inlet channels, CRL has the expertise to revitalise your assets.

Working to
**British Standard
BS EN1504**
for the repair & refurbishment
of concrete assets

Condition Surveys keeping you in the picture

The British Standard for concrete repair (**BS EN 1504**) requires a detailed inspection to assess the nature and full extent of deterioration. Our survey division, CRL Surveys, delivers a thorough, professional inspection using the latest non-destructive testing (NDT) techniques, culminating in a clear, actionable report that identifies issues and outlines all available repair options. With extensive experience across the wastewater sector, CRL Surveys works directly with water companies, framework contractors, and consultants. Investing in condition surveys allows clients to implement planned, effective maintenance strategies confidently, based on sound engineering knowledge and industry best practice.
